Datalysis 1:1 Mentorship Program
Empowering Growth Through Personalized Guidance
Overview

The 1:1 Mentorship Program by Datalysis is a personalized, expert-led support system created for individuals navigating careers in data science, analytics, and related fields. It is tailored for students, working professionals, and career changers who seek guidance on their specific goals, skill development, and job readiness.

Key Objectives

- Provide personalized career planning and structured roadmaps
- Guide mentees on tools, technologies, and real-world applications
- Offer constructive feedback on projects and academic work
- Prepare candidates for job interviews, including technical and HR rounds
- Deliver ongoing support to address evolving learning needs

Who Are the Mentors

Mentors are experienced data scientists and analysts from industries such as finance, retail, healthcare, and technology. They possess deep hands-on experience in tools like Python, SQL, Power BI, Tableau, Scikit-learn, and more. Each mentor is chosen for their ability to communicate clearly, share real-world insights, and support mentees across different learning levels.

Program Structure

The program begins with an initial session to understand the mentee's background, goals, and expectations. Based on this, a personalized learning plan is created. Mentorship includes regular 1-on-1 live sessions (typically biweekly), along with asynchronous support through email or chat. Key components include:

- Introductory kick-off session
- Personalized learning roadmap
- Biweekly 1-on-1 mentorship calls (30–60 minutes)
- Support via email or messaging between sessions
- Project feedback and guidance
- Resume and LinkedIn profile review
- Mock interviews with detailed feedback
- Sharing of exclusive learning resources and templates

Ideal Candidates

The program is suitable for:

- Students who want career direction and practical project experience
- Professionals looking to advance or switch into data roles
- Career changers who need structured support and skill-building
- Learners who benefit from guided mentoring instead of self-paced courses

Benefits of the Program
- Clear understanding of career pathways and required skills
- Improved confidence during interviews and job applications
- Reviewed and refined project portfolio
- Better visibility on professional platforms like LinkedIn
- Personalized answers to learning and career challenges

Time Commitment
Sessions are typically held twice a month and each lasts between 30 to 60 minutes. The program duration is flexible and generally runs between one to three months depending on the learner's objectives.

Program Access and Enrollment
To get started with the mentorship:
- Apply on the Datalysis website or email your request to datalysis.india@gmail.com
- Fill out a short intake form outlining your background and goals
- Get matched with a suitable mentor based on your level and focus area
- Start your sessions as per mutually agreed availability
